INTRODUCTION

There was a time when human beings were incapable of reaching a consensus because we perceived a hostile world of scarcity, where we had to survive, and to do so we needed to compete for resources against each other. In that context changes were dangerous, the directors of the system established arbitrary regulations that no one could discuss without being punished; no one perceived in himself the power, the dignity or the capacity to build a better society. Thus we accepted that a handful of people would impose their obscure vision and personal interests, while millions of us kept silent and obeyed.

At that time anyone with the courage to dissent was punished, criticized, ridiculed and subjected to public scorn for thinking for himself.

It was a time when we felt safe and fortunate if we were governed by institutions, it was a time when life had a lower value if you were born far away, your skin was darker or the shape of your eyes was different, and it was right to gather large amounts of resources to eliminate people who did not think as the institutions ordered or if they had different beliefs.

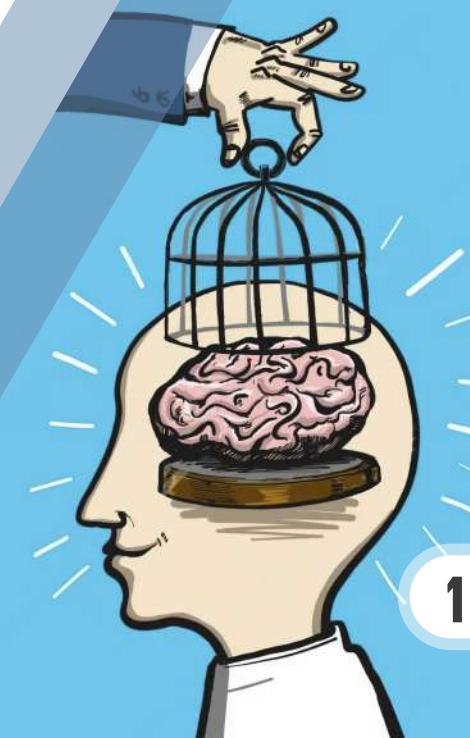

Believe it or not, there was an era when human beings were trained to obey, to be submissive and to ignore that they

were free.

Those humans had an eternal sense of scarcity, they had everything at their fingertips but were trained to see value always outside and far away from themselves. Work was necessary for survival and many considered work a scarce commodity. They did chores without love, passion or desire, in order to buy food, have a place to sleep and pay taxes.

That crazy world existed under a tacit agreement where a few recognized themselves with power, privilege and dignity thanks to a disproportionate majority that validated the power, privilege and dignity of those few, renouncing the perception that all were equal.

But one day, when everything seemed impossible to change, a few people with a different perception chose to get together, decide for themselves and infected their peers with the desire to choose; they left their egos aside to get together by thousands and create this model of the world we have today and learned to reach consensus, they discovered that true individual wellbeing is achieved by collaborating for the wellbeing of the closest human being. The awareness of personal worth was born for being who we are, we understood that the presence of each one of us enriches the planet.

Mettacracy

Mettacracy codifies the new model of citizen organization, communities that come out of the united communities that do not go to confront or fight against what is established, but rather recognize their freedom and exercise it by building new paradigms, new coexistence agreements. Communities made up of human beings aware of their worth, their intelligence and the great power conferred by the unity of purpose.

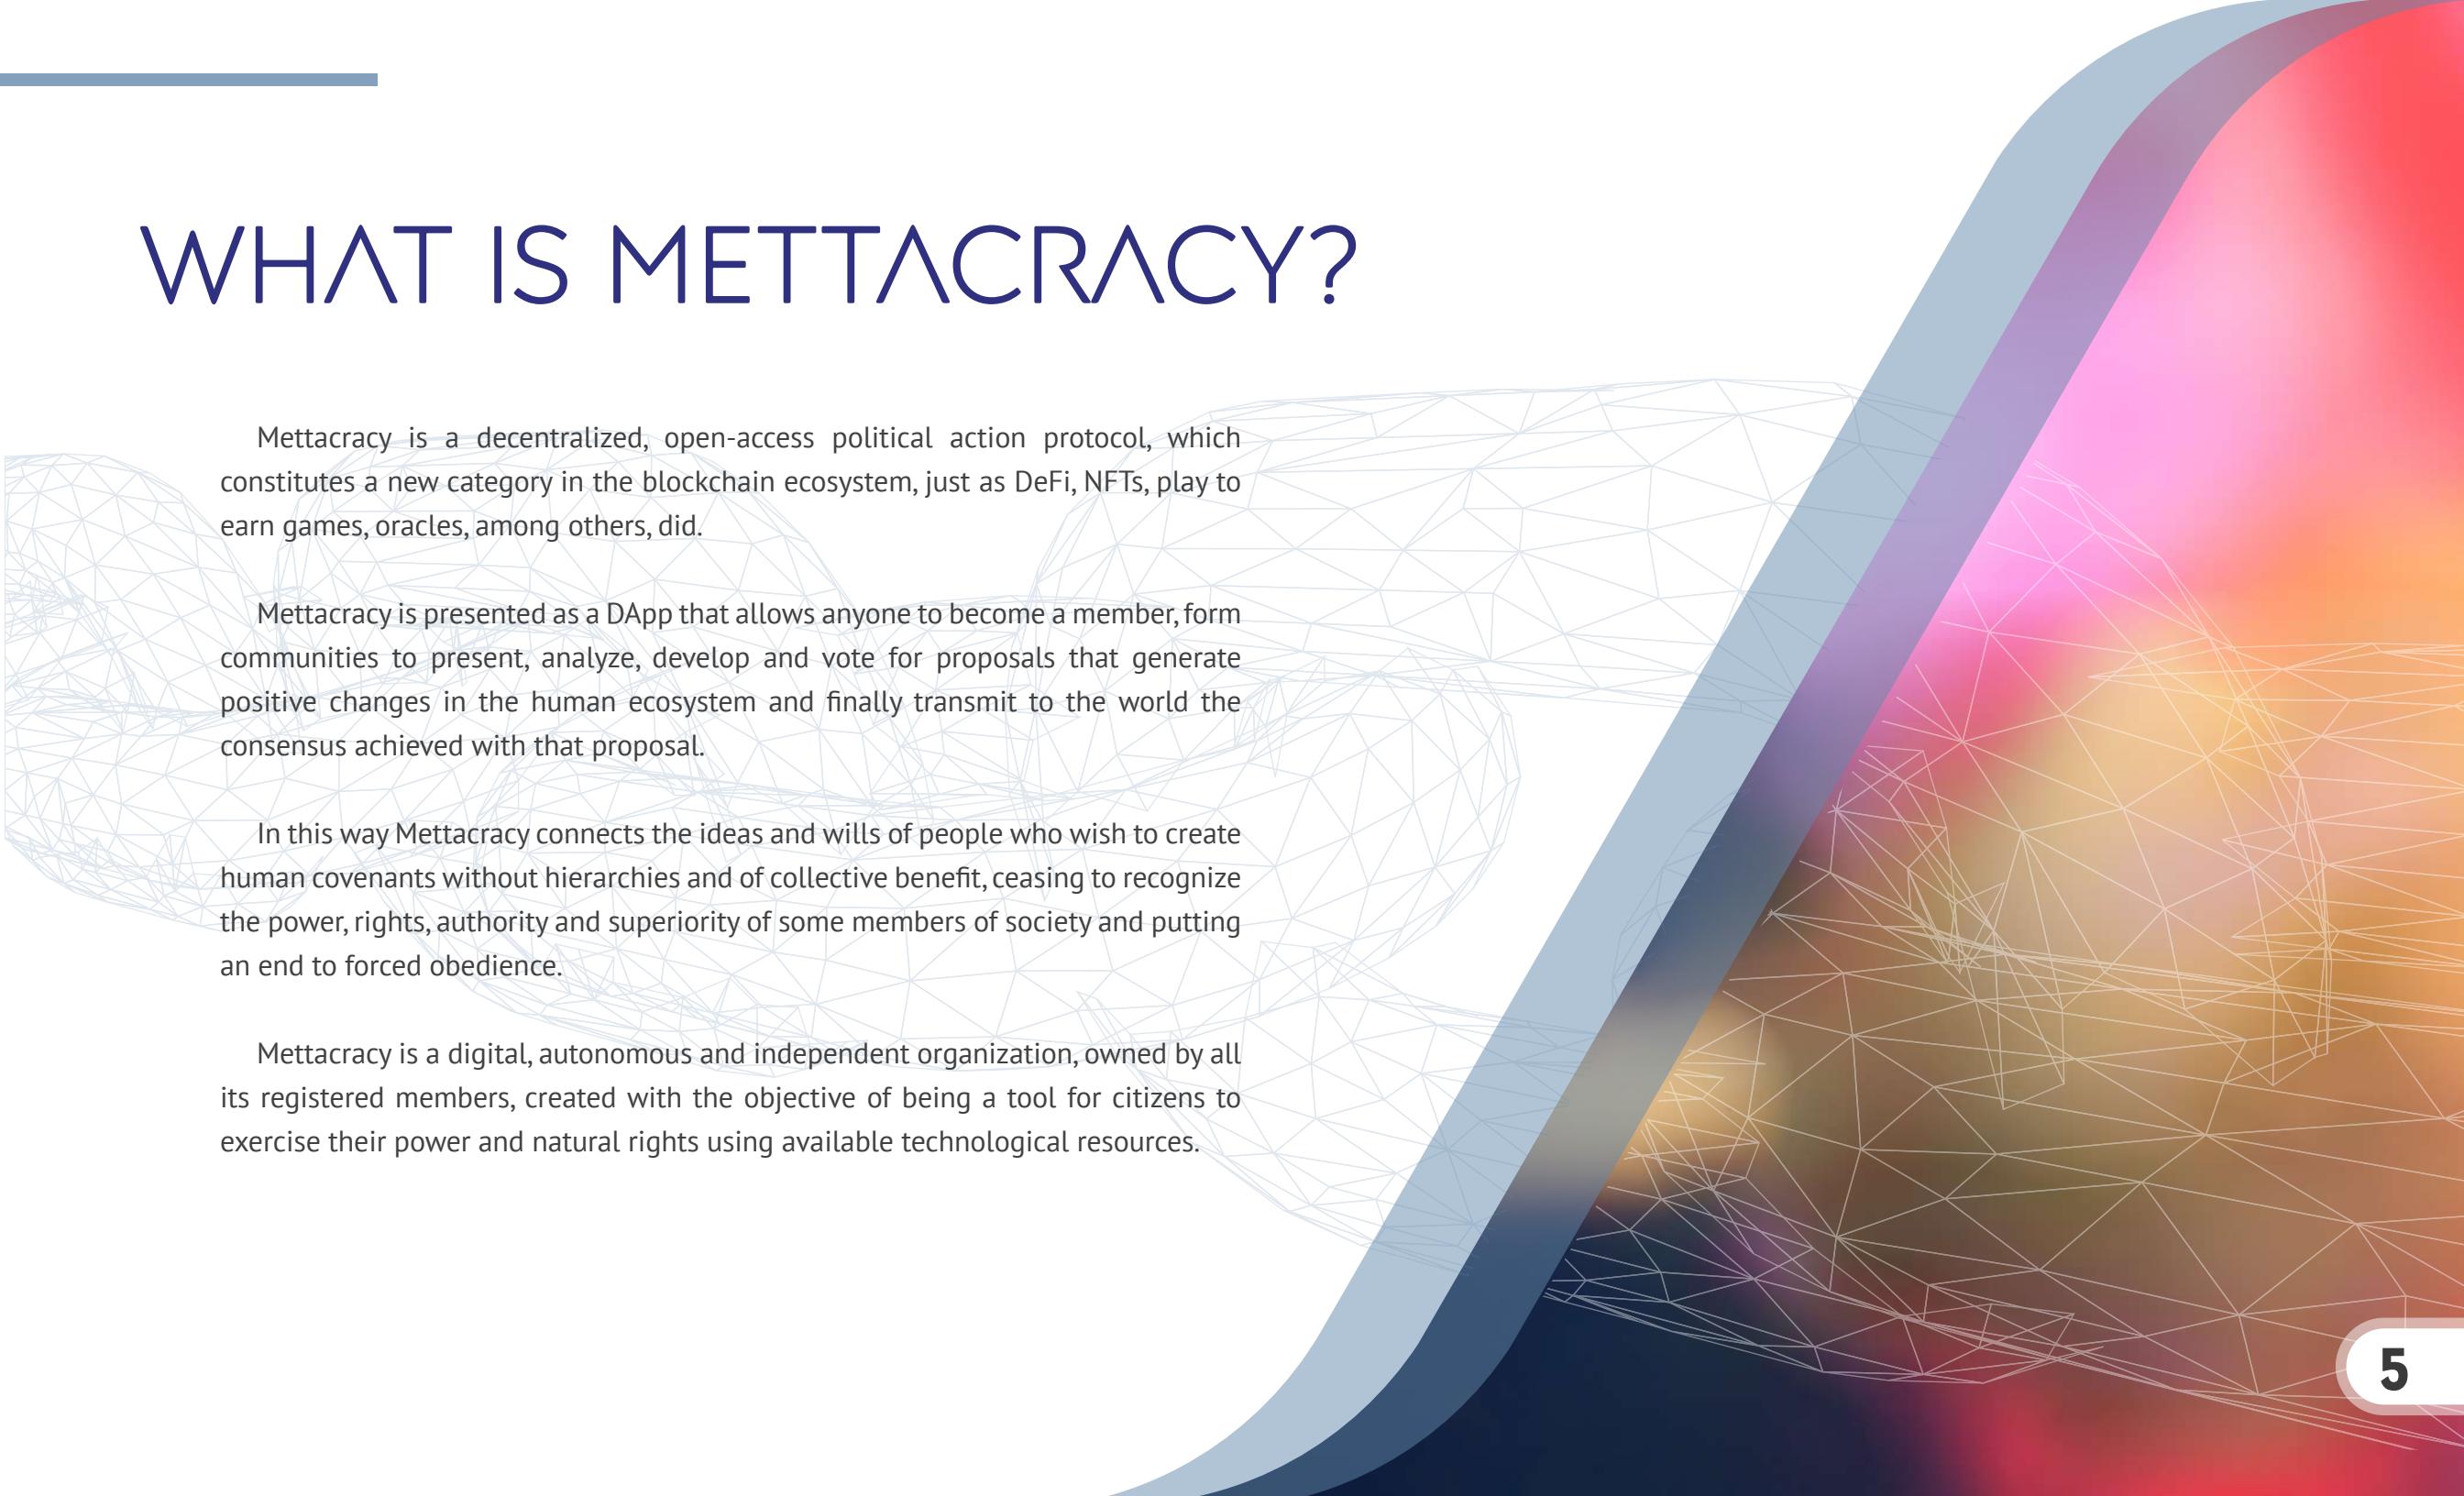

PROBLEMS DETECTED

- 
- 1 The current political system has degenerated, in most cases, into a system of control of citizens, their resources and their destiny, which, using demagogic practices, has imposed the interests of groups that seek to perpetuate themselves in power and consider the majority as an obedient herd. For this reason, the majorities do not feel represented by politicians who have clearly been pre-selected by elites to fulfill a hidden agenda dissociated from the general will.
 - 2 There is no practical, expeditious and accepted as valid, fair and effective system for constituting deliberative groups other than traditional institutions without involving the use of force or any kind of coercion, where the actual members of a community reach consensus and build agreements.
 - 3 Citizens have lost their space for participation in decision making that affects them and the right to present their own proposals.
 - 4 Citizens need to build decentralized and inclusive agreements that validate our dignity, our value, our power and our individual rights.
 - 5 Today's digital platforms, such as social networks, blogs and messaging groups, are easy to manipulate and be used as control tools through the use of robots and artificial intelligence, with the aim of generating opinion matrixes, support for any initiative or creating artificial communities to support the interests of those who control them.

"We are innovation for peace,
we are a tool for dialogue
and consensus, we are the method to reach
new agreements without blood in the streets,
without death and destruction.
We, they and you, have the commitment
to build a safe and full world
for the next generations."

WHAT IS METTACRACY?

Mettocracy is a decentralized, open-access political action protocol, which constitutes a new category in the blockchain ecosystem, just as DeFi, NFTs, play to earn games, oracles, among others, did.

Mettocracy is presented as a DApp that allows anyone to become a member, form communities to present, analyze, develop and vote for proposals that generate positive changes in the human ecosystem and finally transmit to the world the consensus achieved with that proposal.

In this way Mettocracy connects the ideas and wills of people who wish to create human covenants without hierarchies and of collective benefit, ceasing to recognize the power, rights, authority and superiority of some members of society and putting an end to forced obedience.

Mettocracy is a digital, autonomous and independent organization, owned by all its registered members, created with the objective of being a tool for citizens to exercise their power and natural rights using available technological resources.

It is a tool for forming legitimate communities based on proposals, ideas or initiatives that benefit the community and the human ecosystem.

It is an investment DAO where the treasury, with the consensus of the participants, is in charge of generating profitability for all in proportion to their contribution.

It is an information platform with a team of communicators, linked to blogs, social networks, forums, messaging groups and media, connecting Mettocracy with the world.

It is an open and free forum for the discussion of proposals, ideas or initiatives that benefit the community and the human ecosystem

It is a state-of-the-art electoral Dapp that guarantees the expression of the majority within the community.

VALUES THAT DEFINE US

Lorem ipsum

DEMOCRACY

Decisions in Mettocracy are made by consensus of the members, verified by voting where each member is entitled to only one vote regardless of the volume of tokens held.

TRANSPARENCY

Mettocracy members have full freedom of access to all information in the system. Communications are public.

EQUALITY

People of any gender, nationality, political affiliation or socioeconomic status are free to become members of Mettocracy, after fulfilling the steps required for registration. Their powers and rights are equal for all.

INDEPENDENCE

Mettocracy is a protocol for exercising politics in a free and independent manner, created to bring together the minds and wills of its members without political, ideological, or religious orientation.

ANONYMITY

In Mettocracy we are all anonymous, we identify ourselves by our account ID and the merits earned by our participation

NON-BELLIGERENCE

Mettocracy offers viable and coherent alternatives within a framework of peace and respect. Our mission is to create new paradigms and agreements that promote collective well-being, without the use of conflict or violence.

SELF-SUPPORT

Mettocracy is financially supported by the contribution of each of its members, the profitability obtained from their investments and productive activities.

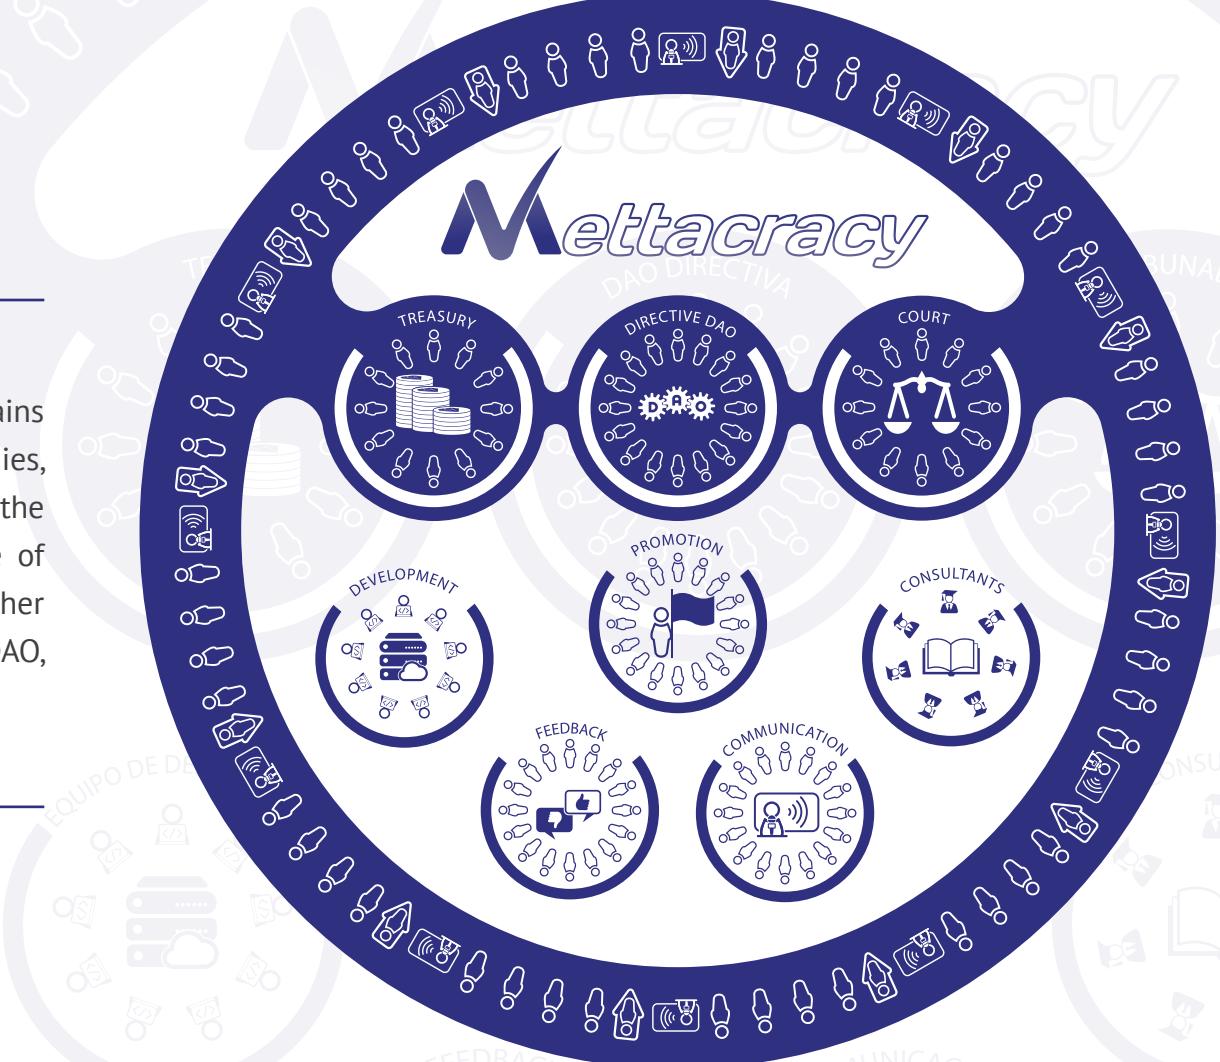

LEGITIMACY

Mettocracy requires proof that its members are real people and that their account is unique

METTACRACY STRUCTURE

Mettacracy is a digital body that contains collective intelligence, without hierarchies, where power resides in the consensus of the majority of members. The basic structure of Mettacracy is simple and is made up of other more specialized DAOs: Directive DAO, Treasury, Tribunal and Work Teams.

DIRECTIVE DAO

Its responsibility is to keep Mettocracy running, make proposals for the evolution of the Mettocracy ecosystem and rely on the development and consulting teams to analyze, develop, implement and evaluate proposals to be approved in general elections by the majority of members. The DAO Board is composed of the major holders of YMA by virtue of being the members most interested in the strength and stability of the organization

TREASURY

His responsibility is to analyze, develop, implement and evaluate financial proposals. He is also responsible for attending to and studying proposals involving investments, disbursement of money or financial transactions, working together with the development team to create the smart contracts that determine Mettocracy's performance in this area, distributing the income obtained among all members and reporting to the community.

COURT

Its responsibility is to resolve any conflict that impedes the consensus and proper functioning of the organization.

EQUIPMENT

Promotion: team of members who offer technical assistance to communities in conflict situations, protest groups, activist associations, promoters take the first steps necessary to form the necessary communities, manage extraordinary days of registration of members, coordinate mentoring sessions to train new members and acts as a moderator in the debates of the communities with which it collaborates.

Consultants: team of professionals and specialists in specific areas who advise internal DAOs, Mettocracy Pools and other members.

Development: team of programmers, designers and technicians.

Comunicación: responsible for establishing communication strategies and coordinating the work of the communicators.

Feedback: responsible for informing members of the impact and consequences of Mettocracy's work in the world.

You have a proposal, an idea to improve something, a solution or an alternative; a plan to achieve a goal that benefits the human ecosystem.

- You write the document that expresses your idea.
- You choose the community or communities where you will find support for your proposal.
- You can also create a new community according to attributes such as age, gender, specific interests, productive activity, among others.

If the invitation is accepted by 1/3 of the members, Mettocracy will publish your proposal on its proposal panel, the communicators will invite the general public to participate and the necessary resources will be made available to develop the proposal.

Mettocracy notifies members of the selected communities the descriptive title of your proposal and each member has the option to accept or decline the invitation to participate.

If the invitation is not accepted by 1/3 of the members, the proposal is recorded as rejected and the comments received are attached.

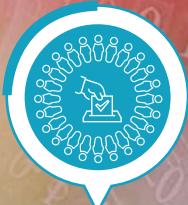

The process of developing your proposal starts with its publication in a clear, detailed and simple way.

You can invite specific members of the community or communities, or a Mettocracy Pool with the experience and capacity to develop your proposal.

Discussions will conform to the rules agreed upon by the Mettocracy community to ensure respect, coexistence, team efficiency and community values. These rules will establish the guidelines of time, extensions and order of participation of the members.

At the end of the process, members will evaluate the contribution of their peers to the final document. Mettocracy records each proposal, the development log, each participation and update, as well as the final outcome of the discussion, as an NFT collection of documents, recorded in blockchain and archived under IPFS protocol.

- Voting process opens for 24 hours
- The process may result in the approval or rejection of the proposal or a choice between several options or alternatives presented.
- The final ballot must have the affirmative vote of 3/4 of those convened.
- To declare an option approved, it must be approved by the affirmative vote of a simple majority of the voters.
- If no option gathers the necessary votes, the Mettocracy Pool will be reactivated to reorganize the proposals.
- Any voting process may be challenged before the court within 72 hours of the issuance of results.
- Once the voting process is completed, Mettocracy issues a YMA token for each vote registered, distributes them among the members of the Mettocracy Pool according to the value of their contribution and the team of communicators.

* Mettocracy is a deliberative community so voting is a requirement to remain in the community.

Mettocracy is a deliberative community so voting is a requirement to remain in the community.

Mettocracy's ultimate goal is to make public every approved proposal of relevance to humanity. To this end, Mettocracy has a team of volunteer communicators who are committed to informing the general public, using social networks, blogs, messaging groups and forums, among others, and establishing contact with media outlets willing to collaborate with our mission.

This team is responsible for establishing contact with companies, institutions, government agencies or organizations in general and directing communications when decisions made in the Mettocracy Pools involve these entities

HOW DOES METTACRACY WORK?

YMA TOKEN

The token concept is appropriate to recognize value in what cannot be priced in money, for example, Bitcoin represents the value of the labor and investment in processing time, acquisition and use of computer equipment necessary to process a transaction on the Bitcoin Blockchain, but if we also add the desire of the general public to own Bitcoin we find a unit of high value in money.

YMA is the official token of Mettacracy, through which one has access to participate and obtain benefits from the protocol.

YMA REPRESENTS:

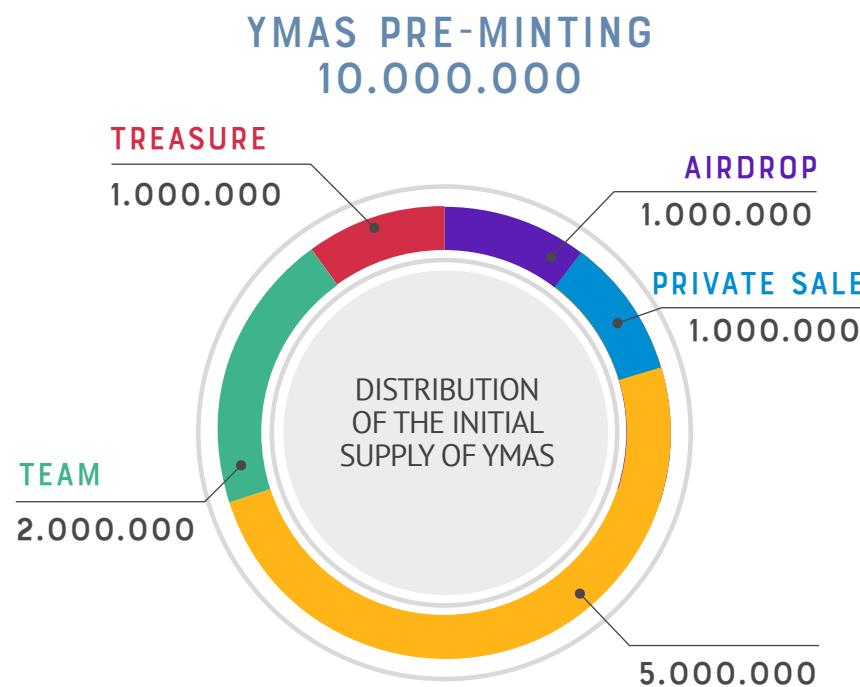

- Mettacracy's value as a technology platform that provides communities with access to legitimate and reliable decision-making.
- The value of contributing ideas for the collective benefit.
- The value of participating in the development of a free, fair and harmonious human ecosystem.
- The value of the collective effort, commitment and trust needed to build a better world.
- YMA is the reward for reaching consensus by overcoming the challenges of working as a team.
- Mettacracy's goal with respect to YMA is to make it recognized and appreciated as a unit of collective power.

TOKENOMIC

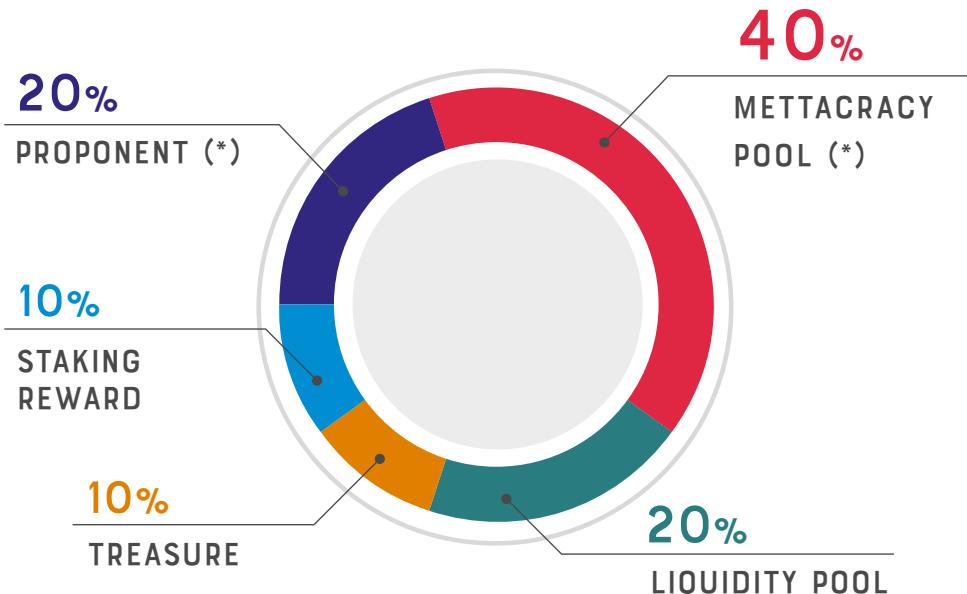

Mettacracy's goal for the token economy is geared towards valorizing our YMA token within the cryptoasset ecosystem to offer members attractive rewards that truly match the value of their effort, commitment, dedication and the trust they place in the protocol when staking.

On these pages you will see the distribution of the initial supply of YMAs and the distribution of YMAs once the protocol goes live.

YMAs MINTING

Each YMA is generated by a member's vote in a voting process and are distributed as follows.

Staking Contract

All Mettacracy members have the option to send YMAs to a staking contract where the blocking time and performance parameters will be stipulated by the treasury.

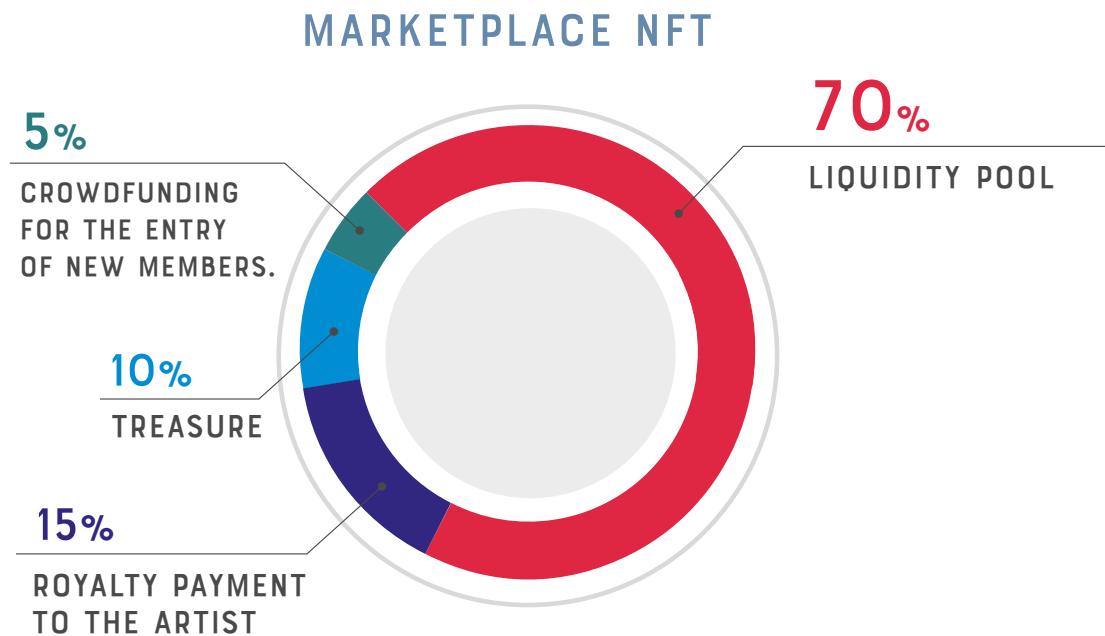

(*) The corresponding total YMAs will be divided into bonuses to be released according to the strategy defined by the treasury with the objective of strengthening the token.

Since Mettacracy is a tool to create communities of human beings, companies, organizations and institutions that need to participate must do so on equal terms with all members, acquiring in the marketplace an NFT identifier that tells the community that this member is not a human being and like any other member, its real identity can never be revealed.

Mettacracy can purchase collections to add value to them with features such as:

- Give access to an organization to be part of a Mettacracy pool.
- Allow organizations to make proposals.
- Allow organizations to invoke a specific Mettacracy pool for the purpose of developing a proposal.
- Allow organizations to invest in a project.
- Enable organizations to form a community.
- Raise funds for humanitarian projects.
- Other functionalities approved by the Mettacracy community.

Revenues from the marketplace will be distributed under the following scheme:

HOW TO REGISTER IN METACRACY

- 1 Find mettocracy.dao using Opera or Brave browser and download the DApp.
- 2 Connect to the Mettocracy DApp using Metamask.
- 3 Login to Member Registration and fill in the information.
Note: No identity or email information is required.
- 4 Choose a registration assistant from the list of those available in your language.
- 5 •The registration assistants are always attentive to assist you.
 - Initiate a video call where you must show your well-lit face and your photograph on an identity document while hiding the rest of your data.
 - The wizard will take a screenshot of your face and the photo of your document and then generate a hash or unique cryptographic identifier that will be informed to you in the DApp with the welcome notification.
 - The interview and the presentation of your identity document are necessary to certify that you are a real human being and can be confirmed at any time.
- 6 To activate full membership rights you are required to deposit with Staking an amount of YMAs which will be indicated in the welcome notification.

Important: "Never reveal your identity" Revealing your identity within Mettocracy results in the removal of your user ID with all the consequences that this implies. "Respect the rest of the community and denounce anyone who creates conflicts".

WHAT RIGHTS DO YOU GAIN BY PARTICIPATING AS A REGISTRANT, MEMBER OR INVESTOR?

✓ REGISTERED

- Participate in Mettocracy Pools.
- Vote in the elections of the Mettocracy Pools in which you participate.
- To occupy the position of communicator.
- Be rewarded for your work.

✓ MEMBER

- Creating communities.
- Submit proposals.
- Voting in any election.
- Occupy any position.
- Be rewarded for your work.
- Obtain financing for projects
- Obtain profitability on your YMAs in staking.
- Early access to investment projects.

✓ INVESTOR

To become an investor you only need to own YMA tokens even if you are not registered in the DApp.

- Staking with your YMA tokens
- Obtain profitability in liquidity pools.
- Buy and Sell NFTs.
- Participating in Launchpad projects.

The greatest value you gain is the ability to initiate or join a collective response to any organization, institution or individual that seeks to subjugate our communities or any of our members.

Imagine a new system where politics is codified in smart contracts, created to improve the quality of life of all involved, proposed and approved by the majority. Imagine a system where children are taught consensus building techniques, how to organize teams, reengineering thinking, where all participants in a community have full rights to participate, propose, lead or delegate their vote to people they know, where parliament is freely accessible; a system where the truth cannot be hidden.

Imagine a world where human rights prevail and we recognize more than 30. A world where the important thing is to have options instead of placing all resources in a single option, where differences are perceived as options that enrich the menu from which we can choose. Imagine a world where there is an awareness of the value of everything around us.

The controlling system has always used fear and violence to force us to give them our attention and recognition, thus maintaining the status quo, that is their way of survival.

The controlling system resents innovation and any technology that empowers humanity, so it tries to stop any progress that does not go its way.

Decentralized systems mark the end of the controlling system, they just didn't see us coming, concepts like blockchain, cryptocurrencies, DeFi, NFTs, DAOs, smart contracts, self-management, free energy, collaborative economy, citizen self-organization, even alternative medicine, are realities that are growing and evolving for the common good.

Mettacracy is one more manifestation of this renovating movement, an exercise of freedom, it is the expression of the will of many visionaries who choose to unite and show what they have to collaborate, worthy people who revoke their covenant of submission and obedience.
